Fabric Technology & Performance - Waterproofs

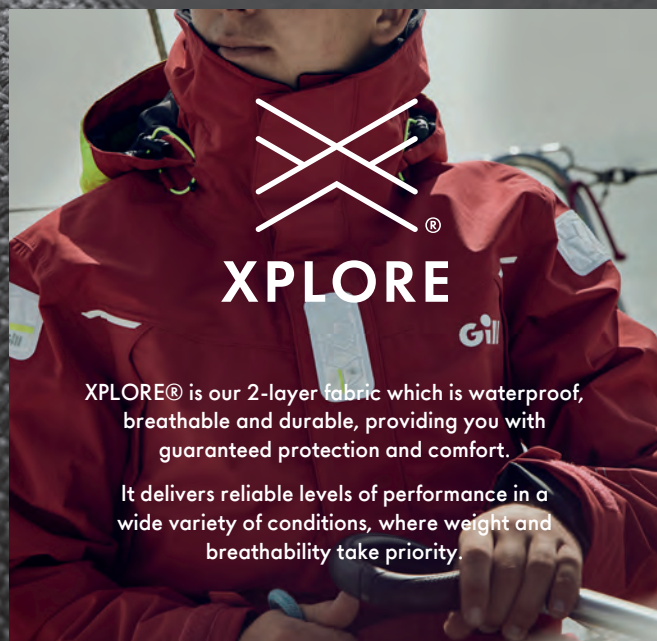

Rather than relying on branded fabric solutions or generic fabrics developed for non-marine conditions, we've taken a different path and invest in more fabric development and testing than any other Marine brand.

Our fabric branding architecture explains the differences between our waterproof fabric technologies as well as giving us an ownable identity.

The naming hierarchy clearly distinguishes our 2 and 3-layer fabric technologies and features across a wide selection of products. For further

guidance our quick-reference scales present levels of performance and explain our fabric technologies, so that consumers can easily identify which garment best meets their needs. This system allows us to share the data directly with the consumer and as well as explaining the differences between XPLORE and XPLORE+, it presents the garments level of Waterproofness, Breathability and Durability.

This information can be found on swing tickets, our website and is shown against each product within this guide where relevant.

XPLORE

XPLORE® is our 2-layer fabric which is waterproof, breathable and durable, providing you with guaranteed protection and comfort.

It delivers reliable levels of performance in a wide variety of conditions, where weight and breathability take priority.

XPLORE+

XPLORE+® is our 3-layer fabric which is waterproof, breathable and durable. It has the added benefit of a lightweight mesh, providing you with guaranteed protection and comfort.

Created for those needing enhanced levels of waterproof protection and increased durability where performance in wet conditions has to be guaranteed.

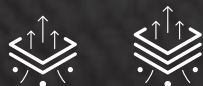

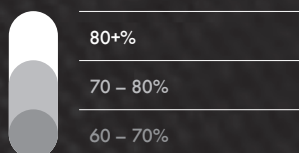

Each garment has been rigorously tested to ensure it meets our stringent performance standards. A rating system has been created to indicate how each garment performs.

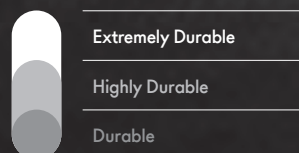

Waterproofness

Breathability

Durability

Since launching in 2021, our revolutionary plant-based fabric finish, XPEL®, continues to provide exceptional levels of waterproof protection to a wide range of products within our collection.

XPEL offers our consumers incredible levels of water repellency; water simply rolls off the outer fabric without a trace, even saltwater which has a lower surface tension and can easily 'wet out' waterproof fabrics. The finish is stain resistant too and will repel grease, mud and oil – even ketchup and red wine can simply be rinsed away.

XPEL also naturally controls odours in a safe and effective way, so fabrics remain fresh even when stored wet.

XPEL delivers this outstanding moisture repellency, stain resistance, stain release and odour resistance without changing the comfort, hand feel, or breathability of our waterproof fabrics. Each fibre of the outer fabric is coated with XPEL during the fabric manufacturing process, resulting in a durable and long-lasting finish. We guarantee consistent levels of performance for up to 30 washes, with the treatment continuing to be effective for up to 50 washes.

For further details on XPEL visit www.gillmarine.com/XPEL

Fabric Technology & Performance

- Icons explained

X4 Super-Stretch

- With up to 2x the stretch of standard neoprene these materials provide the ultimate freedom of movement.

4 Way Stretch

- Materials designed to stretch in all directions allowing complete freedom of movement.

Di-Guard

- High tenacity neoprene designed to protect against wear. Strategically placed panels resist abrasion and prolong the life of your garment.

Thermal Protection

- Materials designed to improve thermal efficiency by trapping body warmth.

Glideskin

- Low-friction glideskin neoprene strategically placed for comfort against the skin and protection from chaffing.

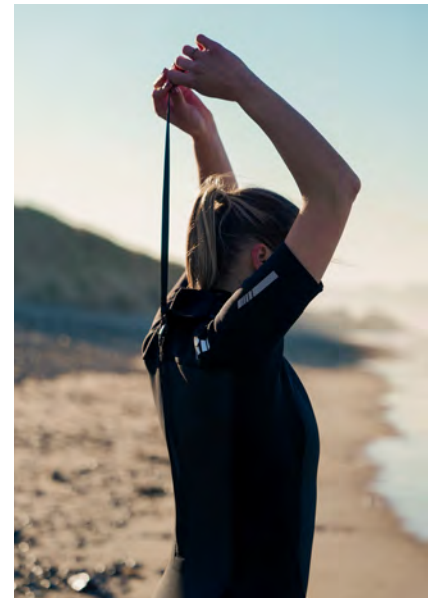

Recycled Content

Sun Protection UPF 50+

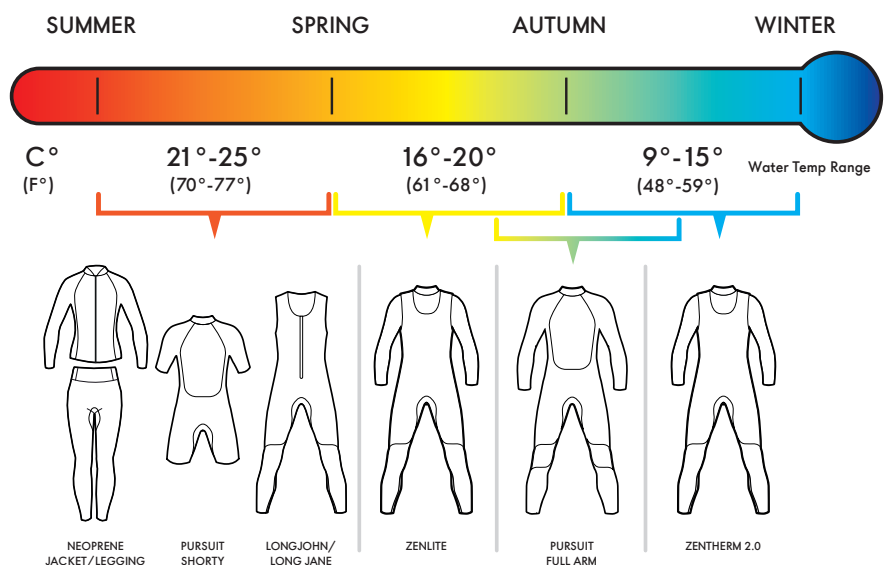

- UPF stands for ultraviolet protection factor and is the sun protective rating measure for fabrics.
- UPF 50+ is the maximum sun protective rating achievable for fabrics and means that the fabric blocks at least 95 % of UVA and 98 % of UVB rays.
- Sun exposure causes skin damage
- Only covered areas are protected
- EN 137358-2:2003+A1:2006 (E)

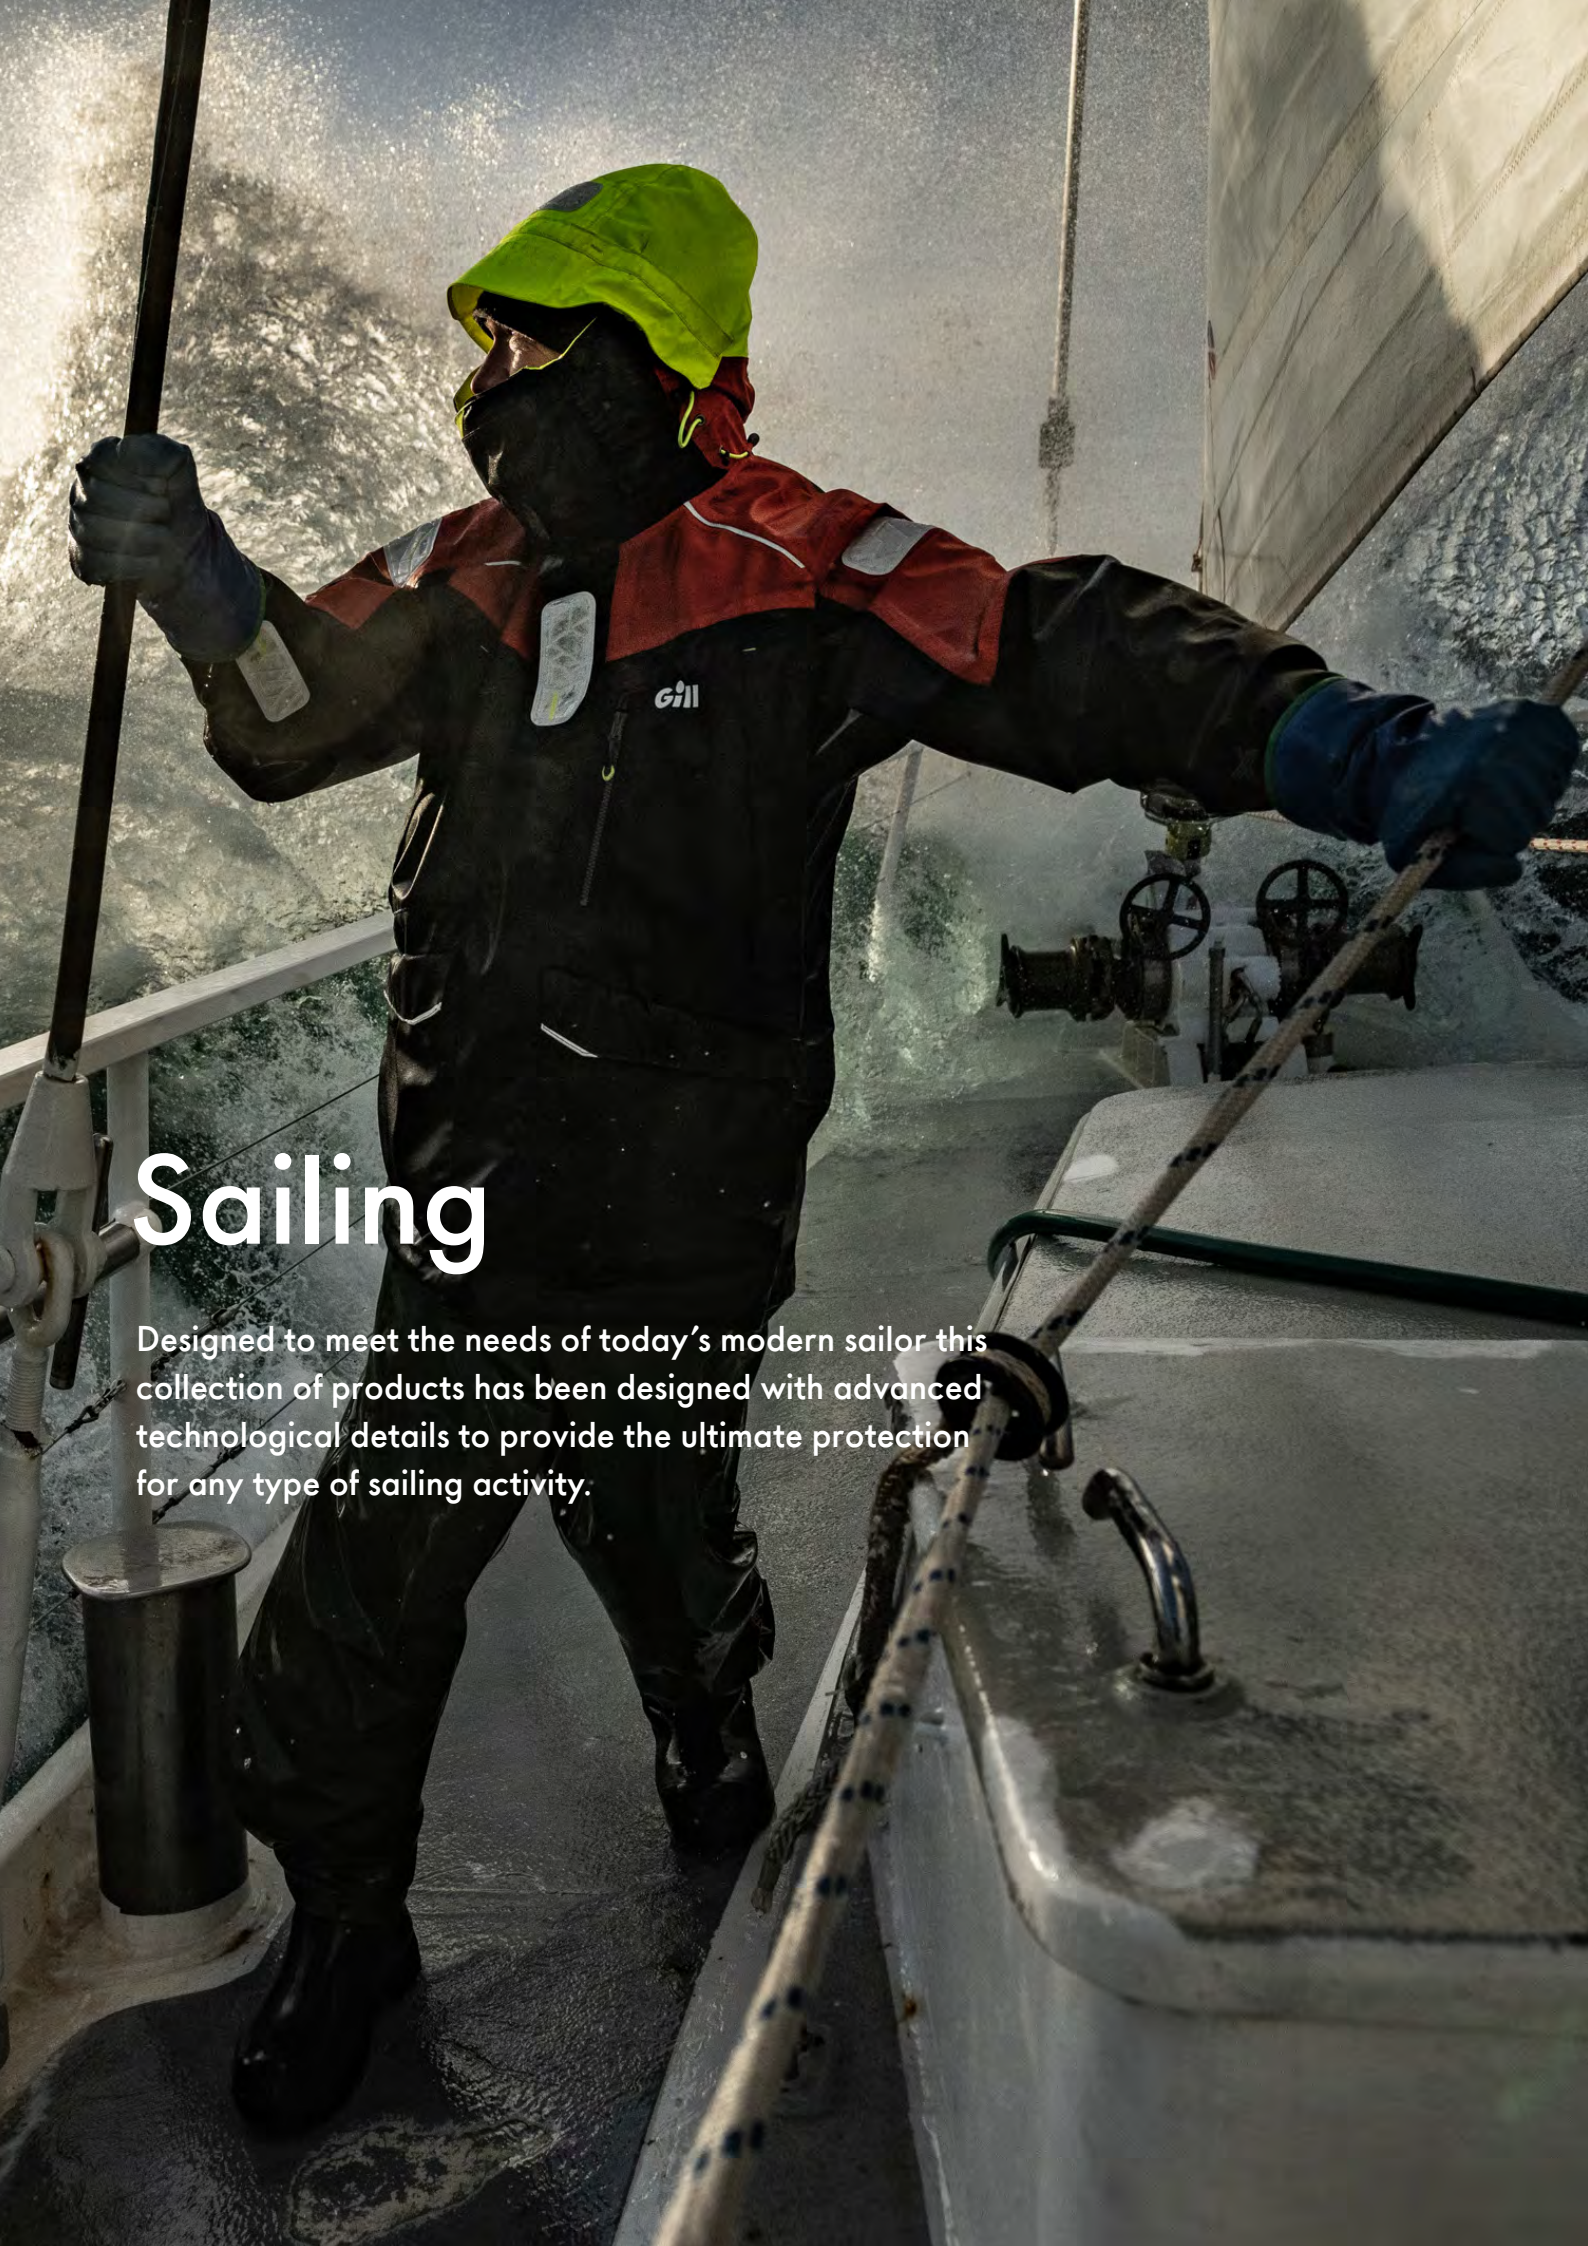

We have been using neoprene for many years, mostly in our wetsuits designed for dinghy sailing. In recent years we have expanded our range of neoprene products as more and more consumers are now getting out on the water for a range of water activities.

Our collection ranges in thickness and style, giving consumers choice and flexibility. The below guide offers further guidance as to which Gill style is right for the consumer in terms of seasonality.

NEOPRENE USAGE GUIDE

* FOR REFERENCE ONLY: The product required will depend on many factors including body type, level of activity, and the outside temperature. ZENLITE / ZENTHERM 2.0 guidance given based on wearing full outfit

Sailing

Designed to meet the needs of today's modern sailor this collection of products has been designed with advanced technological details to provide the ultimate protection for any type of sailing activity.

OS1 OCEAN JACKET OS13J

Technology:

- XPLORE+® 3-layer waterproof and breathable fabric
- XPEL® water & stain repellent treatment
- High performance, durably waterproof and breathable

Features/Benefits:

- Ocean height collar with a concealed, wrap-around face guard
- Thermal brushed mesh inner collar and chin guard
- Abrasion resistant panels to protect against wear and tear
- Photoluminescent safety reflectors
- 2-way zipper protected by a double storm guard
- Deep cargo pockets with secure closure with hand warmer pockets behind
- Chest hand warmer pockets
- Adjustable outer cuff with hi-vis PU inner seals for watertight comfort and increased visibility
- PLB attachment point
- Security pocket protected by a YKK Aquaguard zipper
- Shackle tool and hanging clip included

Fabric Composition:

- Shell: 100% Nylon
- Panel: 100% Polyester

Regular fit

		Waterproofness	Breathability	Durability
		Over 20,000mm HH	80%+	Extremely Durable
		Up to 20,000mm HH	70%	Highly Durable
		Up to 10,000mm HH	60%	Durable

Colour: Graphite/Orange.
Sizes: XS-XXL

EYEWEAR

Glare-free vision

Polarized lenses block the glare produced by light reflecting off the water or bright deck surfaces which can create a distracting haze; a real issue when you're looking for marker buoys or checking sail trim. Optically-corrected, shatter-resistant cushion elements are laminated to both sides of the UV absorbers, followed by a unique scratch resistant coating applied to the outer surfaces.

Natural colours

Filter category 3 lenses allowing 8-18% light transmission and are useful in bright sunlight, driving and general purpose wear.

100% UV400

UV light absorbers, which block 100% of harmful UVA, UVB, and UVC radiation.

Reduced eye fatigue

A quality optical lens is used to prevent vision distortion as cheaper lenses bend and misdirect light so that sizes, shapes and even distances can become distorted – leading to eye strain as you're forced to compensate. They comply with European Class 1 Optics Standards.

Floatable

Designed for life on the water, all Race and Performance sunglasses float.

Hydrophobic

Hydrophobic outer coating sheds water and reduces salt residue for clear vision.

Oleophobic

Oleophobic technology applied to the inside face repels fingerprints, sun lotion and skin oils. This is the same technology found on touch-screen devices to reduce finger marks.
